Profile

Self-taught full stack developer. Quick learner and passionate about learning new technologies. Active problem solver with diverse soft and hard skills.

Professional Experience

Software Engineer, Swabhav Techlabs 11/2020 – present
Worked on Talent sourcing and mentoring system. Developed frontend and backend application in GO, Angular. Developed and modified software modules based on requirements.

Projects

Envelope Finance, Budget Planner 📄
EnvelopeFinance is a web-based platform that empowers users to take control of their finances by utilizing the power of envelope budgeting. Users can easily budget and manage their money in a simple and effective way. We provide users with the tools they need to make smarter financial decisions, build better budgeting habits, and ultimately achieve their financial goals.

MCQ Generator 📄
It uses OpenAI GPT-3 to generate MCQ questions with options and the correct answer. This application can be useful for institutes where MCQ test are frequently conducted by professors wherein this tool can help them create questions based on the topic they enter.

Library management system
Built a website where students can search for books and add them to their list. Students can check which books are available. Tech stack used is Go, Angular and MySQL. Also used Docker to create image and deployment purpose.
